### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael K. Boyer on April 17, 2006.

The application has been amended as follows:

- 1) add a period after the Roman Numeral (IV) in claim 16.
- 2) on page 8 of the amendment filed February 2, 2006 the extraneous writing is to be deleted (see Examiner's amendment to page 8 of 27).
- 3) on page 11 of the amendment filed February 2, 2006 the extraneous writing is to be deleted (see Examiner's amendment to page 11 of 27).
- 4) on page 12 of the amendment filed February 2, 2006 the extraneous writing is to be deleted (see Examiner's amendment to page 12 of 27).
- 5) on page 18 of the amendment filed February 2, 2006 the extraneous writing (3,7) is to be deleted (see Examiner's amendment to page 18 of 27).
- 6) on page 20 of the amendment filed February 2, 2006 the extraneous writing (2,6-bis) is to be deleted (see Examiner's amendment to page 20 of 27).
- 7) on page 21 of the amendment filed February 2, 2006 the extraneous writing is to be deleted (see Examiner's amendment to page 21 of 27).

***Information Disclosure Statement***

2. The information disclosure statements (IDS's) submitted on February 23, 2004; October 28, 2004; and November 12, have been considered by the examiner.

***Allowable Subject Matter***

3. Claims 1-18 and 20-38 (now claims 1-37) are allowed.

4. The following is an examiner's statement of reasons for allowance: WO 00/67072, which is the closest prior art, teaches a compound having the structure norbornene-  
 $\text{OCH}_2\text{C}(\text{CF}_3)_2\text{OH}$ , which is similar in structure to the claimed compound and it has a similar utility however, the instant compound differs from the compound of WO 00/67072 in that the instant compounds require that the carbon of the alkoxide group bonded to the oxygen which is bonded to the bridged carbocyclic ring has at least one fluorine-containing group bonded to said carbon. Thus, in order to anticipate the claim at least one of the hydrogens in the  $\text{CH}_2$  group of WO 00/67072 would have to be substituted with a fluorine-containing group. The prior art fails to teach making such a substitution. The prior art also fails to make this substitution obvious because although it is known in the prior art that fluorination can substantially increase transparency [see section 3 of the Dammel reference (J. of Photopolymer Science and Technology, Vol. 14, No. 4, 2001) submitted by Applicants], the prior art does not teach or fairly suggest making the fluorination in the manner disclosed by Applicants, i.e., that the carbon of the alkoxide group bonded to the oxygen which is bonded to the bridged carbocyclic ring has at least one fluorine-containing group bonded to said carbon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the

issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rosalynd Keys whose telephone number is 571-272-0639. The examiner can normally be reached on M-W & F 4-10pm; H 5:30am-5pm; Sat 8am-1pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
